# LEHI IN THE DESERT

By Hugh Nibley, Ph. D.

## VI

### Place Names in the Desert

THE stream at which he made his first camp Lehi named after his eldest son; the valley, after his second son (1 Nephi 2:8.) The oasis at which his party made their next important camp "we did call . . . Shazer." (*Ibid.*, 16:13.) The fruitful land by the sea "we called Bountiful," while the sea itself "we called Irreantum." (*Ibid.*, 17:5.)

By what right do these people rename streams and valleys to suit themselves? No westerner would tolerate such arrogance. But Lehi is not interested in western taste; he is following a good old Oriental custom. Among the laws "which no Bedouin would dream of transgressing," the first, according to Jennings-Bramley, is that "any water you may discover, either in your own territory or in the territory of another tribe, is named after you."<sup>228</sup> So it happens that in Arabia a great *wady* (valley) will have different names at different points along its course, a respectable number of names being "all used for one and the same valley. One and the same place may have several names, and the *wadi* running close to the same, or the mountain connected with it, will naturally be called differently by members of different clans," according to Canaan,<sup>229</sup> who tells how the Arabs "often coin a new name for a locality for which they have never used a proper name, or whose name they do not know," the name given being usually that of some person.<sup>230</sup> Names thus bestowed by wandering Bedouins "are neither generally known nor commonly used," so we could of course not expect any of Lehi's place names to survive.<sup>231</sup>

Speaking of the desert "below the Negeb proper," i.e., the general area of Lehi's first camp, Woolley

and Lawrence report, "peaks and ridges have different names among the different Arab tribes, and from different sides,"<sup>232</sup> and of the nearby Tih, Palmer says, "In every locality, each individual object, whether rock, mountain, ravine, or valley, has its appropriate name,"<sup>233</sup> while Raswan recalls how "miraculously each hill and dale bore a name."<sup>234</sup> But how reliable are such names? Philby recounts a typical case: "Zeyd and 'Ali seemed a little vague about the nomenclature of these parts, and it was only by the irritating process of continual questioning and sifting their often inconsistent and contradictory answers that I was able in the end to piece together the topography of the region."<sup>235</sup> Farther east Cheesman ran into the same difficulty: "I pointed out that this was the third different hill to which he had given the same name. He knew that, was the reply, but that was the way they named them."<sup>236</sup> The irresponsible custom of renaming everything on the spot seems to go back to the earliest times, and "probably, as often as not, the Israelites named for them-

in these mountains, the water bears a different name from the wadi."<sup>238</sup> Likewise we might suppose that, the river having been named after his first-born, the location of the camp would be given, as any westerner would give it, with reference to the river. Instead, the Book of Mormon follows the correct Arabic system of designating the camp not by the name of the river (which might dry up sometime), but by the name of the valley. (1 Nephi 10:16, 16:6.)

Another surprise: Nephi more than once refers to the river of Laman as "flowing into the fountain of the Red Sea." Since when is the Red Sea a fountain, forsooth? Answer: ever since it was called a *yam*. "In Hebrew," writes Albright, "the word *yam* means '(large) river' and 'fresh water lake' as well as 'sea' in the English sense. In our case we cannot, however, be sure whether the designation *yam* came originally from inland, referring to pure fresh water as the source of life, or . . . it referred to the Mediterranean as the main source of Canaanite livelihood."<sup>239</sup> In the

---

---

selves their own camps, or unconsciously confounded a native name in their carelessness."<sup>237</sup> Yet, in spite of its undoubted antiquity, only the most recent explorers have commented on this strange practice, which seems to have escaped the notice of travelers until our own times.

Even more whimsical and senseless to a westerner must appear the behavior of Lehi in naming a river after one son and its valley after another. But the Arabs don't think that way: In the Mahra country, for example, "as is commonly the case

former case *fountain* is the best translation of the word, and it is certainly in this "inland" sense that Nephi uses it, for he uses a totally different expression (as we shall see) when speaking of the ocean. The Nile and the Euphrates were anciently called *yams*, and this has been explained as "probably a kind of poetic hyperbole, founded upon the fact that they annually overflow their banks."<sup>240</sup> Now the average width of the Gulf of 'Aqaba is only about twelve miles, and Musil reports that one can look right across it and "see on the Sinai

A great desert poet, Abu Sokhr, wrote that nothing on earth brings verses as readily to mind as running water and wild places.

peninsula not only the mountains of the south part of the peninsula, but also the plain extending north. . . . To the South we had a view of the greater part of the at-Tihama shore."<sup>241</sup> From the Arabian side, then, the northeastern arm of the Red Sea for over a hundred miles (i.e., in the sector where Lehi's party first came upon the sea, (I Nephi 2:5) is not an open sea at all, and is not the Red Sea; it is a broad and elongated sheet of water like the Nile and Euphrates at flood, and like them it is not closed water—not a great lake—but opens out to the sea, flowing out through two channels, each but five miles wide. The corresponding western arm of the Red Sea anciently had the mysterious and much-discussed name of *Yam Suph*, "sea (or fountain) of weeds (or rushes)." If it was called a *yam*, what is more natural than that its twin gulf to the east should bear the same desig-

JUNE 1950

nation? The latter certainly was what the ancients called a *yam*, that word having, whether applied to salt water or fresh, the basic meaning of source or fountain. Please note that Nephi does not call the Red Sea a fountain, but rather refers to this gulf as a fountain of the Red Sea—a feeder, as it were, with spring torrents flowing into it (*Ibid.*, 2:9), a *yam* in the very sense that the Nile and Euphrates at flood were *yams*.

When the party reached the ocean, "we beheld the sea, which we called Irreantum, which, being interpreted, is many waters." (*Ibid.*, 17:5.) But why did they not simply call it the sea and be done? Because there was no name in their language to designate this particular sea; so they simply gave it a name of their own. The ancients regularly resort to epithets when speaking of the great outer seas, as the "Great Green" of the Egyp-

tians and the "Great Deep" of the Hebrews. In Coptic, the latest form of Egyptian, the Red Sea proper was called *fayum nehah*, literally "many waters."<sup>242</sup> If one wanted to speculate, it would be easy to trace Irreantum back to some derivation containing Eg. *wr* (great) and *nt* (Copt. *nout* "standing water"), or to identify the final *-um* with the common (Eg., Copt., Heb.) *yem*, *yam*, *yum*, "sea" and the rest of the word with Copt. *irnahte* "great or many." But we need not go so far: It is enough to know that in Lehi's day the ocean was designated by epithets, and that the sea to the east was called "many waters" by the latest Egyptians.

The first important stop after Lehi's party had left their base camp was at a place which they called *Shazer*. The name is intriguing. The element *shajer* is quite common in Palestine place names; it is a collective meaning "trees," and many Arabs (especially in Egypt) pronounce it *shazher*. It appears in *Thoghret as-Sajur* (the Pass of Trees), the ancient *Shaghur*, written *Segor* in the sixth century.<sup>243</sup> It may be confused with *Shaghur* "seepage," which is held to be identical with *Shihor*, the "black water" of Joshua 19:36.<sup>244</sup> This last takes in western Palestine the form *Sozura*,<sup>245</sup> suggesting the name of a famous water hole in south Arabia, called *Shisur* by Thomas and *Shisar* by Philby.<sup>246</sup> It is a "tiny copse" (Thomas) and one of the loneliest spots in all the world. So we have *Shihor*, *Shaghur*, *Sajur*, *Saghir*, *Segor* (even *Zoar*), *Shajar*, *Sozura*, *Shisur*, and *Shisar*, all connected somehow or other and denoting either seepage—a weak but reliable water supply—or a clump of trees. Whichever one prefers, Lehi's people could hardly have picked a better name for their first suitable stopping place than *Shazer*.

Before leaving the subject of waters, it would be well to note that Nephi's mention of a river in a most desolate part of Arabia has caused a good deal of quite unnecessary eyebrow-raising. Though Hogarth says that Arabia "probably never had a true river in all its immense area,"<sup>247</sup> later authorities, including Philby, are convinced that the peninsula has supported some quite respectable rivers even in his-

## USING EXAMPLES

(Concluded from page 514)

words the more vivid will be the picture. Instead of talking about children, talk about John and Mary and Jim. Use "nouns that bleed" and "verbs that sting and rattle."<sup>3</sup> If you can choose between two words, choose the one that is simpler but conveys the more clear-cut image. Compare, for instance, the mental pictures the following sentences create:

<sup>3</sup>*Ibid.*, p. 88.

If a man can excel other men, the world will find and honor him.

If a man can write a better book, preach a better sermon, or make a better mousetrap than his neighbor, though he builds his house in the woods, the world will make a beaten path to his door.

Emerson, Lecture in 1871

Facts, figures, stories, comparison, pictures, and colorful words are tools of a successful speaker. Learn to use them effectively.

# MORE STEEL FOR THE WEST

## THROUGH NEW PRODUCTION FACILITIES AT GENEVA AND COLUMBIA STEEL COMPANIES

■ As part of an 18-million dollar conversion program pledged by United States Steel at the time of the purchase of the war-born Geneva Plant from the Government in June, 1946, the Geneva Steel Company recently installed and put into operation equipment for production of *hot rolled coils*.

These coils, known familiarly to the trade as "breakdowns," are an intermediate product intended for further processing. As such, the Geneva-rolled coils are now being shipped to Columbia Steel's new cold reduction mill at Pittsburg, California, where they're converted to sheet and tin plate. Between them, these two mills can supply Western steel buyers with an estimated 325,000 tons of flat-rolled products each year.

An all Western venture from start to finish, the combination of the new facilities of these two U.S. Steel subsidiaries marks a new forward step in the industrial growth of the West.

## Lehi in the Desert

(Continued from page 487)

toric times. The point to notice, however, is that Lehi made his discovery in the spring of the year,<sup>248</sup> when that part of the world is full of rushing torrents. Moreover, the very fact that Nephi uses the term "a river of water," to say nothing of Lehi's ecstasies at the sight of it, shows that they are used to thinking in terms of *dry* rivers—the "rivers of sand" of the East.<sup>249</sup> One only speaks of "rivers of water" in a country where rivers do not run all the time. But in the spring it is by no means unusual to find rivers in the regions through which Lehi was moving, as a few examples will show.

"We . . . descended . . . into Wady Waleh. Here was a beautiful seil, quite a little river, dashing over the rocky bed and filled with fish. . . . The stream is a very pretty one . . . bordered by thickets of flowering oleanders. Here and there it narrows into a deep rushing torrent. . . ."<sup>250</sup> Describing the great wall that runs, like our Hurricane fault in Utah, all along the Dead Sea, the Arabah, and the Red Sea, an earlier traveler says: "Farther south the country is absolutely impassable, as huge gorges one thousand to fifteen hundred feet deep (compare Lehi's "awful chasm") and nearly a mile wide in some places, are broken by the great torrents flowing in winter over perpendicular precipices into the sea."<sup>251</sup> The sea is the Dead Sea, but the same conditions continue all down the great wall to "the borders which are near the Red Sea." One is reminded of how impressed Lehi was when he saw the river of Laman "flowing into the fountain of the Red Sea." On the desert road to Petra in the springtime "there are several broad streams to pass, the fording of which creates a pleasant excitement."<sup>252</sup> A party traveling farther north reports, "we presently came upon the deep Wady 'Allan, which here cuts the plain in two. How delightful was the plash and gurgle of the living water rushing over its rocky bed in the fierce heat of that Syrian day!"<sup>253</sup>

Given the right season of the year, then—and the Book of Mormon is obliging enough to give it—one need not be surprised at rivers

in northwestern Arabia. It was this seasonal phenomenon that led Ptolemy to place a river between Yambu and Meccah.<sup>254</sup>

When Ishmael died on the journey, he "was buried in the place which was called Nahom." (I Nephi 16:34.) Note that this is not "a place which we called Nahom, but the place which was so called, a desert burial ground."<sup>255</sup> The Arabic root *NHM* has the basic meaning of "to sigh or moan," and occurs nearly always in the third form, "to sight or moan with another." The Hebrew *Nahum*, "comfort," is related but that is not the form given in the Book of Mormon. At this place, we are told, "the daughters of Ishmael did mourn exceedingly," and are reminded that among the desert Arabs mourning rites for the dead are a strict monopoly of the women, related Hebrew rites being less exclusively female.<sup>256</sup> Ishmael here seems more of an Arab than ever, while Nephi continues to display unerring accuracy on every point.

#### LEHI'S Qasid

There is no more surprising or impressive evidence for the genuineness of the Book of Mormon than the eloquent little verses (they are a sort of *qasid*)<sup>257</sup> which Lehi on one occasion addressed to his wayward sons.

It was just after the first camp had been pitched, with due care for the proper rites of thanksgiving at the "altar of stones." Lehi, being then free to survey the scene more at his leisure (among the desert people it is the women who make and break camp, though the *sheikh*, as we have seen, must officiate in the sacrifice), proceeded, as was his right, to name the river after his first-born and the valley after his second son. (I Nephi 2:6-8, 14.) They examined the terrain more closely, as Arabs always do after pitching camp in a place where they expect to spend some time, and discovered that the river "emptied into the fountain of the Red Sea," at a point "near the mouth thereof" (*Ibid.*, 2:8-9), which suggests the Gulf of 'Aqaba at a point not far above the Straits of Tiran. When Lehi beheld the view, perhaps from the sides of Mt. Musafa or Mt. Mendisha,<sup>258</sup> he turned to his two el-

der sons and recited his remarkable verses. Nephi seems to have been standing by, for he takes most careful note of the circumstance:

And when my father saw that the waters of the river emptied into the fountain of the Red Sea, he spake unto Laman, saying: O that thou mightest be like unto this river, continually running into the fountain of all righteousness!

And he also spake unto Lemuel: O that thou mightest be like unto this valley, firm and steadfast, and immovable in keeping the commandments of the Lord! (I Nephi 2:9-10.)

No subject has been more inten-

sively studied than that of primitive Semitic poetry, and nowhere could one find a more perfect illustration of the points that are now agreed upon as to the nature and form of the original article than in this brief account of Nephi's.

First there is the occasion: It was the sight of the river flowing into the gulf which inspired Lehi to address his sons. In a famous study, Goldziher pointed out that the earliest desert poems ever mentioned are "those *Quellenlieder* (songs to springs of water) which, according to the record of St. Nilus, the an-

## FLY UNITED to the LDS CENTENNIAL in Hawaii!

(August 9-20)

You're only a few hours away!

Flying United is the fast, easy way to attend the LDS Centennial in Hawaii. Fast, luxurious Mainliners take you from any of United's 81 cities coast to coast and border to border *direct* to San Francisco where you board United's great, new twin-deck Mainliner Stratocruiser.

United's Mainliner Stratocruiser is the world's finest Stratocruiser—the *only* one with a six-compartment cabin including a beautiful lower deck Hawaiian Lounge . . . specially designed foam-rubber seats and footrests . . . and a centrally-located galley for better meal service. (Berths and a private stateroom available at extra charge.)

Fares are surprisingly low. Ask about United's many special Air Tours to Hawaii.

## LEHI IN THE DESERT

(Continued from preceding page)

cient Arabs used to intone after having refreshed and washed themselves in some fountain of running water discovered in the course of a long journeying."<sup>200</sup> Nilus' own account is a vivid picture of what Lehi's party went through:

The next day . . . after making their way as is usual in the desert by devious routes, wandering over the difficult terrain, forced to turn aside now this way,

now that, circumventing mountains, stumbling over rough, broken ground through all but impenetrable passes, they beheld in the far distance a spot of green in the desert; and striving to reach the vegetation by which the oasis might provide a camp or even sustain a settlement for some of them (we are reading *nomadikon* for the senseless *monadikon*), as they conjectured, they turned their eyes towards it as a storm-tossed pilot views the port. Upon reaching it, they found that the spot did not disappoint their expectations, and that their wishful fantasies had not led them to false hopes. For the water was abundant,

clear to the sight and sweet to the taste, so that it was a question whether the eye or the mouth was the more delighted. Moreover, there was adequate forage for the animals; so they unloaded the camels and let them out to graze freely. For themselves, they could not let the water alone, drinking, splashing, and bathing as if they couldn't revel in it enough. So they chanted songs in its praise (the river's), and composed hymns to the spring . . .<sup>200</sup>

- <sup>247</sup>*Penetration of Arabia*, p. 3
- <sup>248</sup>Nephi's story begins "in the commencement of the first year of the reign of Zedekiah." (1 Ne. 1:4) and moves very rapidly. Since, "in the Bible throughout the 'first month' always refers to the first spring month," (Yaluda, *Accuracy of the Bible*, p. 201), Nephi's "commencement of the year" would fall in the springtime, regardless of when Zedekiah began to reign, since the Jews like the Egyptians dated a king's rule from the beginning of the real year, the ritual time of coronation.
- <sup>249</sup>The term is also used by Egyptian and Greek writers, e.g. Alexander the Great crosses a "river of sand" in the desert. The Arabs call a dry lake "sea of salt," or *Bahr bila ma*, i.e. "lake without water," (Burton, *Pilg. to Al-Madinah*, etc. p. 72, n. 1). To us it seems pedantic to distinguish between lakes of water and lakes of something else, but the discrimination is important in a land where most lakes and rivers are dry ones.
- <sup>250</sup>E. H. Palmer, in *Surv. of Wstn. Palest. Special Papers*, p. 67f
- <sup>251</sup>C. R. Conder in *PEFQ* 1875, p. 130f

## Lehi in the Desert

the men play a more prominent part in mourning rites, and even professional male mourners were not unknown, Nowack, *Hebr. Archaeol.*, p. 196.

<sup>287</sup>The word *qasid* is used to denote various types of Arabic verse including the now unknown primitive poetry of the desert. It is in this sense that we employ it here. The root *qsd* means to "intend," hence it applies to a poem with an objective—money, love, or moral instruction. Authorities disagree as to the original motif. Harder's dictionary applies the word to any kind of poem.

<sup>288</sup>The river would flow between these two mountains, as is indicated in the *National Geographic Map* of the area. The valley seems to be commodious enough. We suggest an investigation: from the most ancient times it has been the custom for travelers in the desert to inscribe their names on rocks at places where they have camped (Th. Nöldeke, *Die Semitischen Sprachen*, p. 37). It is almost certain that Lehi's people left their marks at the more important stopping places.

<sup>289</sup>J. Goldziher, *Abhandlungen zur arabischen Philologie* (Leiden, 1896) I, 58

<sup>290</sup>St. Nilus, in *Migne Patrol. Graec.* 79, 648

## On The Bookrack

(Continued from page 466)

In the latest edition, this set of books has been brought up-to-date and extensively supplemented to keep abreast of the ever-extending frontier of newer knowledge and recent happenings in the world. It covers the fields of Science, History, Hygiene, Geography, Civics, Economics, Nature Study, Physiology, Biography, Industry, Handicrafts, Transportation and Communication, Mining and Mechanics, Writing and Riddles, Arithmetic and Recreation, Art and Entertainment.

And all these formidable facts, made easy and understandable, are interspersed with the ageless and indispensable poems and stories from the world's finest literature for children.

Furthermore, planned courses of study are provided for those who want to use them.

In picture and in print *The Book of Knowledge* is an ever delightful, colorful, informative, and entertaining storehouse of almost anything a youngster would want to inquire about, from the minute things of the earth to the remote things of the universe. And all it contains is palatably presented to simplify the teaching problems of parents and the learning problems of children.—R. L. E.

## A HANDBOOK OF HUMAN RELATIONS

(Everett R. Clinchy, Farrar Straus and Company, New York. 146 pages. 1949. \$2.00.)

DR. CLINCHY has battled these many years for a sensible peace among men of different faiths, occupations, and origins. In this volume he has arranged his argument and plea in such a manner that contending groups could profitably use it as a textbook. He does not ask for the surrender of beliefs, but for the laying aside of prejudices

which in one way or another are retarding our national development.

—J. A. W.

## THE JOURNEY TO THE PROMISED LAND

(Deta P. Neeley. Deseret News Press, Salt Lake City, Utah. 122 pages.)

THIS book, which the author calls "the first book in the series called 'A Child's Story of the Book of Mormon,'" has been carefully prepared by Dr. Neeley for all children to understand. Children with "fourth-grade reading ability will be able to read the book for themselves." The fictional

approach will delight young people and will be approved by older folk since the author deals very carefully with the original text, the Book of Mormon itself. The author tells the leaving of Jerusalem, the return for the plates, the wandering in the wilderness, the voyage, and finally the landing in the Western Hemisphere.

—M. C. J.

## "MY IRONRITE MAKES HOUSE-CLEANING MUCH EASIER"

Says Mrs. Dean F. Wood,  
2007 McClelland Street,  
Salt Lake City, Utah.

When I purchased my Ironrite automatic ironer, I expected to iron our weekly wash, but I didn't realize what a wonderful help it could be during house cleaning time. I have ironed my curtains with ruffles, drapes, and ruffled bedspread in much less time and really rested from the other more arduous tasks. I have three small children and my husband to iron for, but I iron everything I can wash. Ironite's "Do-All" ironing points, iron tucks and gathers on my little girl's dresses with marvelous ease.

"With its two completely usable open ends, my Ironrite will iron everything I can wash, quickly and beautifully."

Model 80. (left) Open-model Ironrite. Model 85. (shown above) closed-top Ironrite.
